

LETTER OF RECOMMENDATION

Subject: Recommendation of AMTEST-TM Kft / Hungary

Company Continental operates an environmental test laboratory as a part of the development center in Veszprém/Hungary.

During the past years the capacity and the ability of the lab was continuously increased by purchasing new test equipments. For this task we decided to work with AMTEST-TM as they are able to supply our facility with right test equipments (professional environmental test devices: e.g. climatic test chambers, vibration test machines), measurement devices and provide us with excellent maintenance and repair service.

Their experience and willingness is an indispensable value for us and I do think they are really part of our success in automotive business.

Issued on 29/06/2009
